Senior Secondary School Education (PU Board Karnataka)	*Bengaluru, Karnataka*

Work Experience

Centre for Healthcare Engineering and Learning, Intern	Jun. 2025

Working on a classifier model for early detection of Parkinson's disease using voice and handwriting samples

Projects

Parkinson's Disease Detection using Deep Learning | *TensorFlow, Keras, Flask, React, AWS*
- Designed a **CNN-based deep learning model** for automated detection of Parkinson's disease using both voice and handwriting sample data.
- Developing a user-friendly **web/app interface** to let users upload samples and receive instant analysis; deployment on **AWS** for public access.

Sports Celebrity Image Classification | *Flask, OpenCV, Sklearn, HTML/CSS, JavaScript*
- Developed image classification ML model using **wavelet transforms** for feature extraction (**95% accuracy**); implemented Flask backend with **OpenCV** and **Sklearn**.
- Designed responsive frontend with **Dropzone.js** for image uploads.
